

**"METRONIDAZOLE PLEDGETS"**

**ABSTRACT OF THE DISCLOSURE**

5 A dermatological delivery system comprising a topically  
acceptable, inert support selected from the group consisting of cotton,  
rayon, polyester, polypropylene, wood pulp, mohair, nylon fleece, and  
neoprene foam, or combination thereof, impregnated with an about 0.1%  
to about 2% solution of metronidazole; the solution having a major  
solvent component comprising water, ethanol or a mixture of water and  
10 ethanol, the support being operable to permit application of the solution  
to the skin.
